

NI 7 Environment for a Thriving Third Sector

National Indicator (NI) 7 is one of 198 National Indicators that are part of the new way that the performance of local government will be assessed by national government. These 198 National Indicators cover all the national priority outcomes which local authorities will be responsible for delivering, either on their own or in partnership with others. These indicators will be used to measure performance in all areas over the next three years. The Wolverhampton Strategic Partnership has selected NI 7 'Environment for a Thriving Third Sector' as one of its 35 national priority targets. This is good news for the third sector locally as it means improving the environment for a thriving third sector is a priority for Wolverhampton.
